

Economics 8823
Advanced Macroeconomics III
Syllabus
Professor Sanjay Chugh
Spring 2017

Meetings: Tuesdays and Thursdays, 12:45pm-3:30pm
Hopkins Hall 246

Email address: chugh.14@osu.edu

Prerequisites: The first-year economics Ph.D. sequence. Auditors and other upper-level students welcome.

Grading: The final course grade will be based on:

1. Completing a “computational primer:” solving computationally for the deterministic steady state of the basic RBC model – **10% of final grade.**
2. Computationally solving and simulating the basic RBC model, tabulating business cycle statistics and impulse responses – **20% of final grade.**
3. Two or three other projects to be assigned during the course, each of which will be computationally and/or analytically oriented – **(total of 40% of final grade).**
4. In-class presentation of a paper (from a designated set of papers) – **20% of final grade.**
5. Assorted assignments, short writing pieces, quizzes, etc – **10% of final grade.**

Reference Texts: Some “all-purpose” macroeconomics and texts that are likely to be useful to have on your shelf/eshelf:

1. *Frontiers of Business Cycle Research*, 1995. Edited by Thomas F. Cooley. Princeton University Press.
2. *Equilibrium Unemployment Theory*, 2nd edition, 2000. By Christopher A. Pissarides. MIT Press.
3. *Labor Markets and Business Cycles*, 2010. By Robert Shimer. Princeton University Press.
4. *Recursive Macroeconomic Theory*, 3rd edition, 2012. By Lars Ljungqvist and Thomas J. Sargent. MIT Press.
5. *Recursive Methods in Economic Dynamics*, 1989. By Nancy L. Stokey and Robert E. Lucas, Jr., with Edward C. Prescott. Harvard University Press.

Objectives: There are three main objectives for the course.

1. First, the course will trace through some seminal branches of macroeconomic theory over the past 30 years. Emphasis will be on business cycle modeling (which was one of the proximate cause of the revolution in macroeconomics 30 years ago) and macro-labor issues. We will trace these arcs of thought through to modern quantitative partial equilibrium and general equilibrium business cycle models, and identify/examine where some of the current research frontiers lie.
2. A second fundamental objective is to either get started on or continue becoming comfortable with computational solutions of partial equilibrium and general equilibrium business cycle models. Modern macroeconomics can be computationally intensive. We will study basic tools that macroeconomists use to approximate and solve business cycle models.
3. Third, a necessary condition to be a successful economist (not just a successful macroeconomist) is effective communication skills, both written and spoken. It is never too early to begin (or continue) developing such skills. The required in-class presentation of a paper (from among the set of papers I will designate as “student presentation”) fosters this objective.

Outline of Topics: The following is a list of topics and references. Due to time constraints, we will certainly not be able to cover all of these topics. Nevertheless, the topics we skip are, in my view, important ones in macroeconomics, so selected important readings and references for these are provided.

UNIT I: Arrow-Debreu General Equilibrium Theory and Introduction to Computational Methods and Tools

1. Review of / Basics of Dynamic Programming

1. Prescott, Edward C. and Rajnish Mehra. 1980. "Recursive Competitive Equilibrium: The Case of Homogeneous Households." *Econometrica*, Vol. 48, p. 1365-1379.
2. Ljungqvist and Sargent text, Chapter 1.4, Chapter 2.2, Chapter 3, 4, 5
3. Stokey, Lucas, and Prescott textbook

2. Basic Computational Methods and Calibration

4. King, Robert G., Charles I. Plosser, and Sergio T. Rebelo. 1988. "Production, Growth, and Business Cycles I: The Basic Neoclassical Model." *Journal of Monetary Economics*, Vol. 21, p. 195-232.
5. King, Robert G., Charles I. Plosser, and Sergio T. Rebelo. 2002. "Production, Growth, and Business Cycles: Technical Appendix." *Computational Economics*, Vol. 20, p. 87-116.
6. Schmitt-Grohe, Stephanie and Martin Uribe. 2004. "Solving Dynamic General Equilibrium Models Using a Second-Order Approximation to the Policy Function." *Journal of Economic Dynamics and Control*, Vol. 28, p. 755-775.
7. Uhlig, Harald. 1999. "A Toolkit for Analyzing Nonlinear Dynamic Stochastic Models Easily." In *Computational Methods for the Study of Dynamic Economies*, edited by Ramon Marimon and Andrew Scott. Oxford Press.
8. Baxter, Marianne and Robert G. King. 1999. "Measuring Business Cycles: Approximate Band-Pass Filters for Economic Time Series." *Review of Economics and Statistics*, Vol. 81, p. 575-593.
9. Christiano, Lawrence J. and Terry J. Fitzgerald. 2003. "The Band Pass Filter." *International Economic Review*, Vol. 44, p. 435-465.

10. Kaldor, Nicholas. 1957. "A Model of Economic Growth." *Economic Journal*, Vol. 67, p. 591-624.
11. Kuznets, Simon. 1973. "Modern Economic Growth: Findings and Reflections." *American Economic Review*, Vol. 63, p. 247-258.
12. Brock, William A. and Leonard J. Mirman. 1972. "Optimal Economic Growth and Uncertainty: The Discounted Case." *Journal of Economic Theory*, Vol. 4, p. 479-513.
13. Hodrick, Robert J. and Edward C. Prescott. 1997. "Postwar U.S. Business Cycles: An Empirical Investigation." *Journal of Money, Credit, and Banking*, Vol. 29, p. 1-16.

UNIT II: Macro-Labor

3. Macro-Labor I: Labor-Leisure Margin

14. Rogerson, Richard. 1988. "Indivisible Labor, Lotteries and Equilibrium." *Journal of Monetary Economics*, Vol. 21, p. 3-16.
15. Hansen, Gary D. 1985. "Indivisible Labor and the Business Cycle." *Journal of Monetary Economics*, Vol. 16, p. 309-327.
16. Mulligan, Casey B. 2001. "Aggregate Implications of Indivisible Labor." *B.E. Journal of Macroeconomics: Advances in Macroeconomics*, Vol. 1.
17. Cho, Jang-Ok and Thomas F. Cooley. 1994. "Employment and Hours Over the Business Cycle." *Journal of Economic Dynamics and Control*, Vol. 18, p. 411-432.
18. Swanson, Eric. 2012. "Risk Aversion and the Labor Margin in Dynamic Equilibrium Models." *American Economic Review*, Vol. 102, p. 1663-1691.
19. Chetty, Raj, Adam Guren, Day Manoli, and Andrea Weber. "Are Micro and Macro Labor Supply Elasticities Consistent? A Review of Evidence on the Intensive and Extensive Margins." *American Economic Review Papers and Proceedings*, May 2011 p. 471-5.

4. Macro-Labor II: Employment-Unemployment Margin

20. Pissarides, Christopher A. 2000. *Equilibrium Unemployment Theory*. MIT Press.
21. Shimer, Robert. 2010. *Labor Markets and Business Cycles*. Princeton University Press.

22. Rogerson, Richard and Robert Shimer. 2011. "Search in Macroeconomic Models of the Labor Market." *Handbook of Labor Economics*, Elsevier.
